

Informational Interview — the Nerdery

1. What is the build process like for creating scalable websites for larger clients?
2. How does the Nerdery go about utilizing digital strategies between getting project scope and launch?
3. Are developers involved with this process from project scope to launch or is it mainly handed down from project managers and UX Designers?
4. How do you handle UX inside the WordPress Admin Areas. Example: Hillside Church with 72 custom layouts. Is Advanced Custom Fields utilized?
5. What platforms for e-commerce does the Nerdery use, specifically for PHP — Magento, WordPress Woo Commerce or from the ground up?
6. How is collaboration handled between frontend and backend developers?
7. What is work culture like at the Nerdery specifically?
9. How long are project durations?
10. What is your favorite thing about working here?
11. Is there anything people have hard time overcoming when they are hired at the Nerdery?
12. What is necessary for an entry level front end developer at the Nerdery to succeed?
13. How does an employee at the Nerdery progress their skill level?
14. What does the Nerdery look for in a front end developer?
15. Where does my work stand in relation to others who have started in front end development at the Nerdery?
